L1-M5 · WORKING ALONGSIDE MORO

Working alongside MoRo

Everyday habits on the shared floor

1. **Give it room**
   Let MoRo finish its path. Its route can change from day to day.

2. **Move with steady intent**
   Hesitating at its edge can make it slow down or pause.

3. **Do not squeeze past**
   No tight gaps, no resting items on it, no testing its sensors out of curiosity.

4. **Treat it like any moving equipment**
   Give it the same attention you give any moving industrial equipment.

Predictable people, predictable robots.
